

# Year 1: Digital Literacy

## Key Learning

I can use technology with an adult, helping me to communicate safely with other people I know such as friends and family.

I know I must ask an adult before I share anything online.

Things should not be put online without asking an adult first.

I can use technology for many things and can use keywords to search for the things I need.

Passwords are used online to keep me and my information safe.

My personal information such as where I live, where I go to school and my family's names must be kept safe.

I must remember to be kind and considerate online so I don't upset anyone.

Know that people online might make us feel sad, embarrassed or upset.

Know that we have trusted people to turn to who can help us when we feel sad, worried or frightened.

Know that there are dangers when using technology and the different ways to stay safe whilst using digital technology.

## Key Vocabulary

Passwords	These are designed to protect our information and should be kept secret
Key words	Words used to search for something online
Online communication	Using email, or a chat function online to speak to someone else
Adult permission	Asking an adult before doing anything online
Search engine	A website (like google) which allows you to search for something online
