Year 1: Information Technology

Key Learning

There are lots of ways to create **content**.

Green Screen by Do Ink can be used to make people or characters look like they are in different places.

Chatterpix can be used to make it look like a person or objects is talking.

Seesaw can be used to create lots of different types of content including photos, drawings and videos.

Photo | Drawing | Video

Content that we make can be **exported** from one app and into another.

T — This button allows you to add text in Seesaw.

This button allows you to record yourself to explain what you have done.

This button allows you to move and **sequence** items.

There are different **programs** that you can access on a computer to create **content**.

Excel | Word | PowerPoint
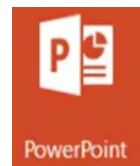

keyboard

trackpad

mouse

Keyboards and **track pads** or a **mouse** are used to input information into a laptop or computer.

Spelling Shed

Sign In

Spelling shed will need you to login using your own **username** and **password**.

Key Vocabulary

Content	Something you create using technology.
Program	Something which you can create content on to fulfil a task
