

## Year 2:

# Animals including Humans

## Key Learning

Animals including humans have offspring which grow into adults.

Growth in humans is as follows:

All animals have 3 basic needs for survival: water, food and air.

In humans and some animals, these offspring will be young, that grow into adults. In other animals, there may be eggs laid that hatch to young or other stages which then grow to adults.

### Butterfly Life Cycle

To stay healthy humans should:

- eat a balanced diet (the right amount of each food group and plenty of fluids).

- exercise regularly
- have good hygiene

## Key Vocabulary

Offspring	A person or animal's child or children.
Growth	The process of getting bigger.
Baby	A very young child.
