

Year 2: Digital Literacy

Key Learning

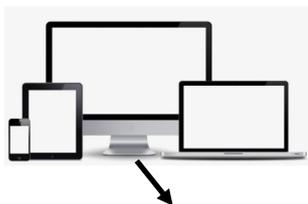

I know that content online can belong to other people.

Not everything that is found on the internet is true.

Information posted online can stay there for a long time. This means what you do now can still be available when you are a grown up

I know that people can look different online than in real life.

I can contact organisations I don't know such as museums and schools online.

I know that some things people put online can be hurtful and upset me.

I know that people can say mean things online or post things that upset or hurt me. I know that I always have a trusted adult to tell if I feel upset or worried about something I have seen online.

I can use voice activated searching using different devices.

I know that spending a lot of time on electronic devices can present different dangers and I know how to protect myself from those dangers. I know the rules to follow when using technology safely.

I know who to talk to if I see something online that makes me feel hurt.

I know that I can go to these people if I know I have put something online that I shouldn't.

I know they will help me.

Set myself a time limit

Stop using and give attention

Take a short break

Do something else

I know how to use an internet search which uses a keyboard or my voice. I also know how to navigate a web page easily using the buttons available on my web browser.

Key Vocabulary

Internet search	Using a search engine (like google) to search for things on the internet
Copyright ©	This is when someone owns the content they have put online
Email	A way to send a message electronically to another
Electronic devices	These are devices such as a computer, tablet or phone used to access technology
Time limits	A way to reduce the amount of time on technology to keep us safe
Voice activation	Using your voice to search for something using a device (like Siri or Alexa)
