You login to the laptops using your username and password.

The **save button** must be used in order to ensure you do not lose any work created.

Use the **microphone button** to add voice recordings to a piece of work.

Some buttons on a keyboard can be used for more than one thing. The shift button is used to switch between the two.

When we press a key on a keyboard it types a lowercase letter. To type a capital letter we must press the shift key and the letter both at the same time.

The backspace button is used to remove anything that has been typed incorrectly.

Caps lock is pressed so that each letter typed is in capital letters.

The space bar is **pressed once** to add a finger space between words when typing.

Key Vocabulary

Search engine	A place to search for information on the World Wide Web using key words or phrases.
Import	Putting content into one application from another application.
Shift key	Used to switch between different symbols on a keypad.
