

How to use the Seesaw Class app at home

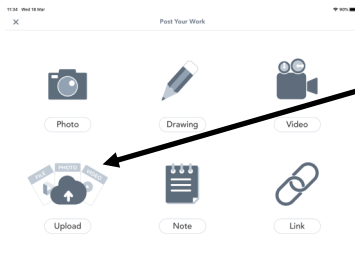

1. Download the Seesaw class app and log in as a student using your child's new QR code. You can also type the letter code to log in.

2. Make sure you are on the class page not the admin one.

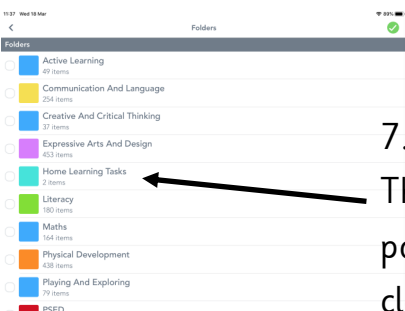

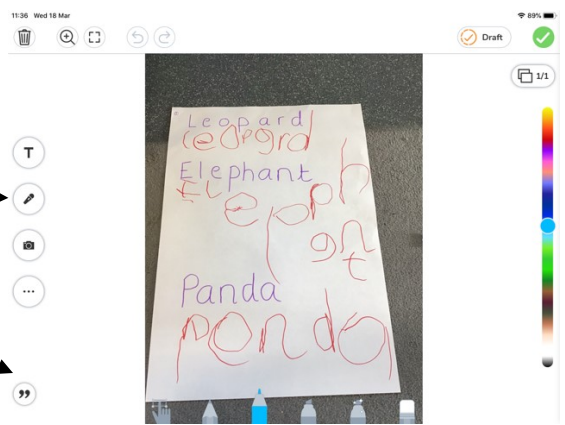

3. Check to see if any new tasks have been posted to your child's wall

4. To complete a task and upload your child's work click the green + sign

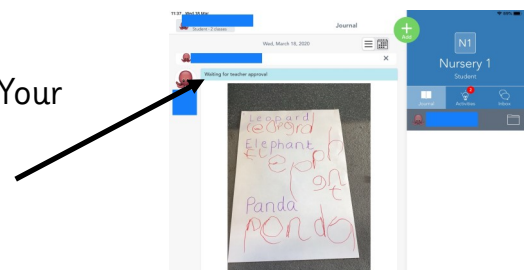

5. You can then select what you would like to post. For photos from your camera roll select the upload option. You can upload multiple pictures by clicking 'add more' when your camera roll is displayed.

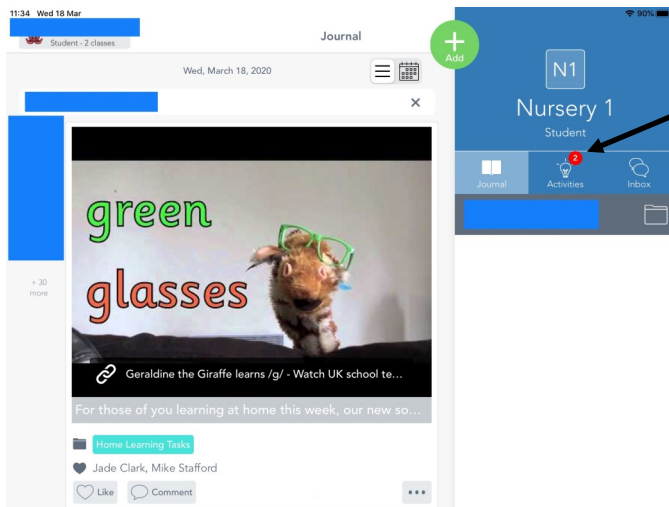

6. Once you have selected your picture then please add a comment by clicking on the speech mark icon or ask your child to record a comment using the microphone icon. Press the green tick to upload.

7. Select Home Learning Tasks. Then the green tick to upload. Your post will then go to your child's class teacher to be approved.

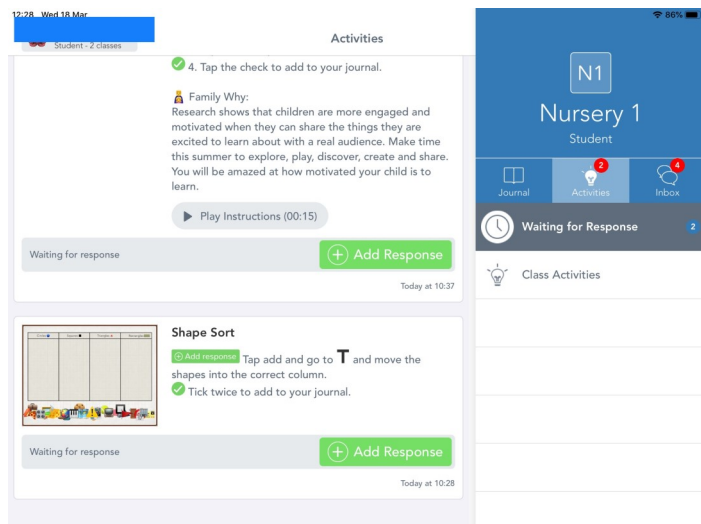

Seesaw Activities

Home learning tasks may also be set as Seesaw activities. You will get notifications here. Click on the Activities tab.

Each activity has its own set of instructions. Your child can complete the activity by clicking the green add response button. Some activities can be completed in the app others are tasks for you and your child to do together.

Please encourage your child to record their own ideas using the microphone option as much as possible this will really help to develop their speech and language skills.

Most importantly please have lots of fun together and keep safe and healthy whilst at home. We hope to see you all back at school soon!
